

Complete Event Suite

Event-centric fundraising and credit card processing.

Greater Giving Complete Event Suite is an integrated solution that includes event management, online registration and fundraising, and payment processing for fundraising events. Complete Event Suite allows you to manage all the details needed to plan and run fundraising events, creating a better experience for guests, staff, and volunteers.

Complete Event Suite

Complete Event Suite bundles three Greater Giving solutions into a single offering with discounted set-up and support, reducing costs and streamlining your event management system. The Suite includes Event Software, Auctionpay, and Online Payments.

Greater Giving Event Software

Event Software takes the worry out of your next event by enabling you to capture, track, and manage all event details in a centralized location, from item procurement and packaging to reconciling and reporting on event revenue. It helps to deliver a smooth guest experience with itemized receipts prepared during the event, eliminating long check-out lines. And, it allows you to track supporters and fundraising results from year-to-year, so you can target efforts to improve on outcomes over time.

Auctionpay

Auctionpay terminals or card readers are designed specifically to help guests pay for their purchases quickly, easily, and securely at nonprofit or school benefit events. When guests register a credit card at the beginning of the event, check-out lines are shorter, giving guests a better experience.

“We appreciate the depth of the software—it enables you to run your event in any manner you wish.”

John Creager, Canine Companions

Greater Giving Online Payments

Online Payments allows nonprofit organizations and schools to collect event registrations and raise funds online. This solution enables you to provide secure, real-time online payment processing that can be used alone, in conjunction with a live event, and with other Greater Giving solutions.

Solution Features

Feature	ES	AP	OP
Capture, centralize, track, and manage all benefit event or auction details	X

Track success year-over-year to improve results over time	X		

PCI Compliance

Go beyond standard practice by complying with the Payment Card Industry (PCI) Data Security Standard, protecting your donors' payment data after the transaction has been processed.

The PCI Data Security Standards were developed by the major credit card companies to provide the most comprehensive single framework to address all the security, data integrity and privacy concerns associated with processing electronic payment data.

Greater Giving's technology and processes are reviewed quarterly to ensure PCI compliance standards,

"The system made the night really easy for both staff and attendees, I was amazed at how well it worked."

April McKenzie, Bailey House

along with an annual on-site audit by a PCI-accredited third party. That makes Greater Giving a Level 1 vendor, the highest, most secure level for PCI compliance.
